

NASA Important Missions Report

This report contains information about NASA's most significant missions, both past and present, compiled from official NASA sources and public archives. NASA's enduring purpose is scientific discovery and exploration for the benefit of the United States and all humanity.

CURRENT & ACTIVE MISSIONS

Science - Active

NASA explores the secrets of the universe for the benefit of all....

Amendment 49: Corrections to C.13 Science Transport and Robotic Innovation for Deployment and Exploration

NASA explores the secrets of the universe for the benefit of all....

Artemis Campaign (2017-present) - Ongoing

NASA's Artemis campaign aims to establish a sustainable human presence on the Moon, preparing for future Mars exploration. Includes SLS, Orion, and Lunar Gateway.

Europa Clipper (Launch ~2024) - In Development

Mission designed to study Jupiter's moon Europa, investigating whether the icy moon could have conditions suitable for life.

James Webb Space Telescope (2021-present) - Operational

Studies every phase in the history of our Universe, from first luminous glows after Big Bang to formation of solar systems.

Mars Perseverance Rover (2020-present) - Operational

Collecting core samples of Martian rock and regolith for potential return to Earth, searching for signs of ancient life.

NASA Important Missions Report

HISTORICAL MISSIONS (Completed)

Mercury program (1958-1963) - Completed

Mercury program program ran from 1958 to 1963. 6

Gemini program (1961-1966) - Completed

Gemini program program ran from 1961 to 1966. 10

Apollo program (1960-1972) - Completed

Apollo program program ran from 1960 to 1972. 11[a]

Skylab (1964-1974) - Completed

Skylab program ran from 1964 to 1974. 3

Apollo?Soyuz Test Project (1971-1975) - Completed

Apollo?Soyuz Test Project program ran from 1971 to 1975. 1

Space Shuttle program (1972-2011) - Completed

Space Shuttle program program ran from 1972 to 2011. 135[b]

Shuttle-Mir program (1993-1998) - Completed

Shuttle-Mir program program ran from 1993 to 1998. 11[c]

Apollo - Completed

President Kennedy's bold challenge set the nation on a journey unlike any before in human history--a journey to land on the moon.

Gemini - Completed

Bridge to the moon.

Mercury - Completed

America's First Space Program.

Viking - Completed

The Viking Mission to Mars: Determining whether life ever existed on Mars.

Pioneer - Completed

A journey through our solar system and beyond.

Galileo - Completed

Journey to Jupiter.

NASA Important Missions Report

FUTURE & PLANNED MISSIONS

Artemis II - Planned 2026

First crewed mission of the Artemis program, planned to launch four astronauts on a free-return flyby of the Moon in 2026.

Artemis III - Planned

Will land the first astronauts on the lunar south pole, planned for 2026-2027.

NEO Surveyor - Planned 2028

Near-Earth Object Surveyor mission to detect and characterize potentially hazardous asteroids.

NASA Important Missions Report

MISSION SUMMARY

Total missions covered: 22

? Current/Active Missions: 6

? Historical Missions: 13

? Future/Planned Missions: 3

NASA has successfully launched over 200 crewed flights since its establishment in 1958. The agency continues to push boundaries with programs like Artemis, aiming to establish sustainable lunar presence and prepare for human Mars exploration.
